GREY ON THE OUTSIDE BUT IMPRESSIVE ON THE INSIDE!

To bring out that extra bit of flexibility, reliability and productivity and even more speed from our A3 b/w multifunctional systems, we've made a few adjustments in development. For example, we've taken print jobs – large ones too – to the next professional level by increasing the resolution to up to 1,200 dpi. No matter whether you're printing handouts, form letters or employee magazines: All your print results will reflect the highest level of quality and brilliance. Despite all this, we've naturally not neglected the issue of energy efficiency – this is now better than ever.

Of course, these systems are open to the digital and mobile requirements of our time. They can connect to mobile end devices via a WLAN interface and print or scan via a Wi-Fi Direct connection. The systems are operated via a large, colour touch display (with a picture diagonal of 22.86 cm) that you can adapt to suit your requirements.

HIGHLIGHTS:

Best print results: The new b/w systems now operate at a high resolution of up to 1,200 dpi. This ensures that fine lines, line drawings, degree dissertations and also simple Office documents look sharper and more professional. A newly developed toner, which is used in both MFPs, also comes into play here. Thanks to its even application, this really causes a sensation – even when printing in black and white.

Perfect speed: Even large-volume print jobs won't waste your valuable time. The 8056i, for example, can output up to 80 A4 and 40 A3 pages per minute. The warm-up time of approx. 30 seconds is short and the first copy starts after 5.2 (7056i) or 4.7 (8056i) seconds. And scanning too – with a maximum of 220 image pages per minute for duplex, b/w templates – is now faster than ever before.

Unbelievable print volume: A total paper capacity of 7,650 sheets* from up to eight paper feeds* is available to the two b/w MFPs. This ensures that large print jobs do not continue for longer than is necessary as a result of a shortage of paper. Thus, the various paper types and thicknesses in the new SoftSlide cassettes can be processed in a single job. Special formats up to A3+ (305 x 457 mm), paper weights up to 300 g/m^2 and banner paper are not a problem either. You can also select various finishing options* for brochures or letters with tri-folding.

Extremely adaptable: An innovative HyPAS interface, special Solution Packs* and other optional software solutions can be used to adapt the systems to your individual requirements. Recurring jobs can be called directly from the respective system's memory. Naturally password-protected: If the printer you require is occupied, Follow-Me-Printing* comes into effect and your print job is executed on another system. The MFPs can also be addressed via WLAN and with mobile end devices such as a smartphone or tablet. Apple AirPrint, CloudConnect and the free MobilePrint app are available for this.
